

### BB7V Multiband Vertical Antenna

The new BB7V multiband vertical antenna provides coverage from 2 MHz to 30 MHz without radials and requires the use of a tuner. In its nested configuration it is only 60" long and weighs in at 4.5 pounds. It has 6 telescoping sections that extend to a length of 22 feet when fully deployed. The telescoping sections are self locking (no hardware to lose) and can be raised or lowered in less than a minute. For permanent use the sections can be locked in place with a single screw per section. The extreme ease of raising and lowering this antenna will make it a favorite for those who have antenna restrictions or travelers wanting a quick and easy wide band antenna solution. The BB7V is a very slim, low profile antenna.

#### Specifications:

Frequency:	2-30 MHz (with antenna tuner)
Impedance (nominal):	50 ohms
Power Rating:	250 watts PEP
Length:	60" collapsed, 22' fully extended
Weight:	4.5 pounds
Connector:	UHF
