

The **MFJ-860** cross-needle meter reads forward and reflected power and SWR simultaneously at a single glance. This meter may be used for 1.8 to 60 MHz up to 300 watts. The two power ranges are selected by a push button: 30/300 watts forward (and 6/60 watts reflected). The rear has SO-239 jacks for input and output. Meter uses 12 VDC.
