

## MFJ-901B - MFJ's smallest Versa Tuner

The MFJ-901B is our smallest-- 5x2x6 in.-- (and most affordable) 200 watt PEP versa tuner--when both your space and your budget are limited. You can operate anywhere in a band and get low SWR.

You'll get maximum power out of your rig and it'll run cooler and last longer. It matches dipoles, vees, random wires, verticals, mobile whips, beams, balanced and coax lines continuously from 1.8 to 30 MHz. Excellent for matching solid state rigs to linears. Efficient airwound inductor gives you lower losses and more power.

You get SO-239 connectors for transmitter and coax, binding posts for random wire or balanced lines and a wing-nut ground connection. A 4:1 balun for balanced lines is also built into this sturdy, compact tuner. Works with solid state and tube rigs. Fits into your station and your car.
